DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, disclose, or suggest, either alone or in combination an electric synchronous machine having a pitch ratio (coil width/pole pitch width) greater than or equal to 2.5. In this invention the magnetic flux density in the stator iron decreases when the ratio of coil width to pole pitch width (τ_{sp}/τ_p) increases. As a result of the reduced flux density in the stator iron, the radial height of the stator iron can be reduced, thereby gaining installation space. Therefore, the limitations contained on claims 1-15 are considered to be in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
